PROFILE

Frontend Developer with 2.5+ years of experience at Deloitte USI, specializing in React, Angular, TypeScript, and modern frontend architecture. Proven track record integrating GraphQL and Python/FastAPI microservices to optimize data delivery, alongside AI-accelerated workflows (Cursor, Claude, Lovable). Recipient of Deloitte's Applause Award for rapid delivery of an enterprise AI interface.

PROFESSIONAL EXPERIENCE

Software Engineer - 1 (Frontend Developer)

06/2026 – Present

Deloitte USI

- Built scalable React enterprise applications and integrated Python/FastAPI backend services.
- Utilized AI-assisted engineering tools (Cursor, Claude, Lovable) to accelerate UI prototyping, backend logic implementation, and code generation.
- Decreased data retrieval latency by **15–20%** and eliminated over-fetching by architecting custom GraphQL queries, replacing legacy REST endpoints for complex data tables.
- Maintained frontend stability across modern browsers via efficient state management (RxJS, React Context API) and lazy loading.

Analyst (Frontend Developer)

02/2024 – 05/2026

Deloitte USI

- Engineered the end-to-end frontend architecture for an Angular-based AI chatbot within 4 weeks for a healthcare client, earning the **Deloitte Applause Award** for rapid delivery.
- Integrated backend NLP APIs to translate natural language into SQL, allowing non-technical medical personnel to autonomously query healthcare databases.
- Designed and implemented 6 distinct responsive Angular views from scratch, adhering to accessibility and cross-browser compatibility standards.
- Conducted peer code reviews, enforced Git/GitHub pull request standards, and validated service endpoints using Swagger UI and Postman.

SKILLS

Frontend

React, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS/SCSS, Angular Material, Responsive Design, Microfrontends

State Management & Data Layer

RxJS, React Context API, GraphQL, REST APIs

Backend & APIs

Python, FastAPI, Swagger UI, Postman

Build, Test & Dev Tools

Git, GitHub, Vite, Webpack, npm, Jest, Jasmine, Karma

AI & Accelerated Engineering

Cursor AI, Claude AI, Lovable, Generative AI Integration, LLMs, Prompt Engineering

PROJECTS

Code Scanner — Static Analysis & Architecture Visualizer

React 19, Vite, Zustand, Mermaid, HTML5 Canvas

- Built a client-side static code analysis interface that parses JavaScript and Python repositories directly in the browser without external LLM dependencies.
- Implemented interactive architectural diagrams using Mermaid and HTML5 Canvas to map component hierarchies and data-flow dependencies dynamically.
- Structured global application state with Zustand to manage real-time scanning progress and file tree navigation seamlessly.

Developer Portfolio & Showcase Platform

Next.js 16, TypeScript, Tailwind CSS v4, Framer Motion, Vercel

- Engineered a responsive portfolio web application utilizing Next.js Incremental Static Regeneration (ISR) to dynamically fetch and cache live GitHub project data.
- Implemented smooth UI micro-interactions and transitions with Framer Motion alongside a persistent dark/light theme switch using next-themes.
- Optimized asset delivery and responsive layouts using Tailwind CSS v4 to achieve fast client-side rendering on Vercel.

EDUCATION

KLE TECHNOLOGICAL UNIVERSITY

B.E in Computer Science - 8.06 CGPA

08/2019 – 05/2023

Hubli
